

GLOBALSUITE® TPRM

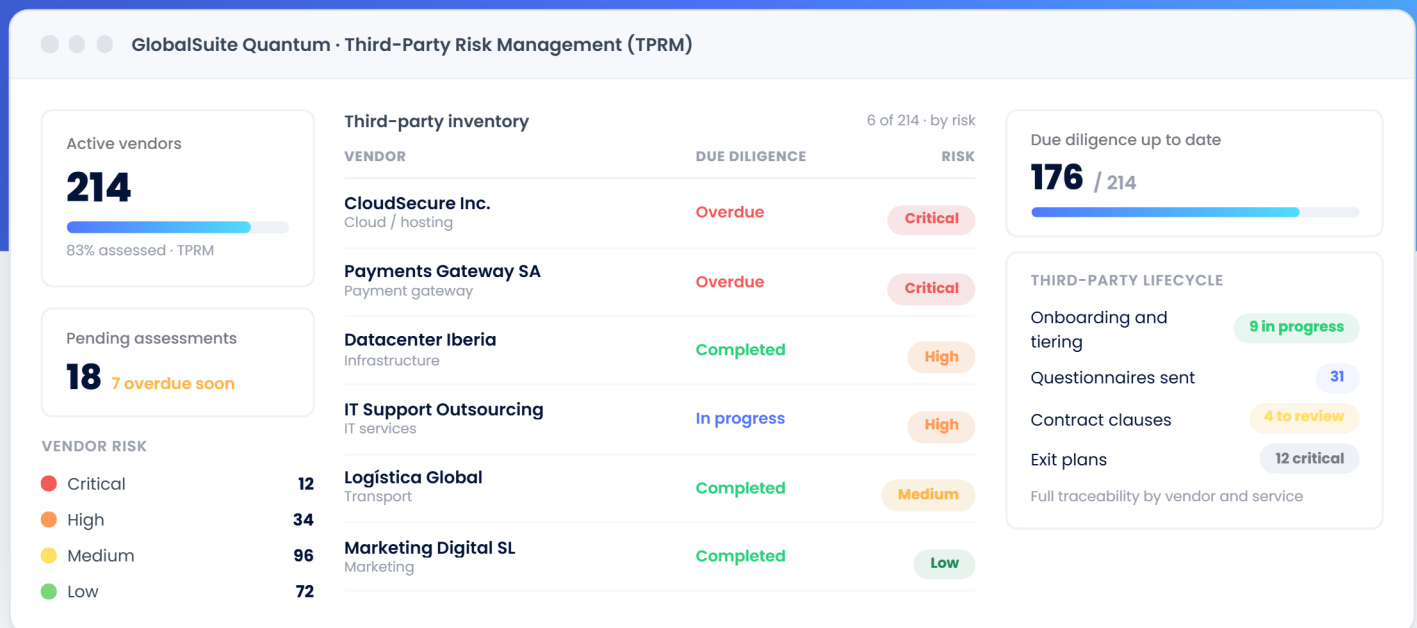

Take control of your supply chain. Third-party risk in real time.

From initial onboarding to continuous monitoring: automate due diligence, assessments and vendor risk control from a single platform, with AI built into every step. The biggest impact reaches you through your third parties.

2,000+ organisations

30+ countries

Assess from day 1

WHY GLOBALSUITE TPRM

Leave spreadsheets and silos behind. Control your third-party risk from a single environment.

No more silos

Full traceability between risks, controls, plans, evidence and owners.

Automate the repetitive

Workflows and automatic calculation that remove errors and hours of manual work.

Data-driven decisions

Executive dashboards and Word and Excel reports always up to date.

Ready from day one

Questionnaires, criticality criteria and due diligence flows preloaded. No starting from scratch.

Third-party inventory

- Onboarding and categorisation.
- Bulk vendor import.
- Critical assets by risk.
- Onboarding and periodic reassessment.

Assessments and due diligence

- Configurable questionnaires.
- Automatic sending, collection and analysis.
- Automated due diligence.
- Results connected to risks.

Third-party risk

- Risks by domain and vendor.
- Automatic maps and dashboards.
- KRIs and treatment plan.
- Residual risk and monitoring.

Compliance and incidents

- Third-party frameworks preloaded.
- Centralised, auditable evidence.
- Incidents linked to each third party.
- Automatic Word and Excel reports.

AI is not a module. It runs across the whole platform.

AI capabilities in production inside every module: they analyse, draft, verify and prioritise where you work. AI proposes; your team reviews and decides. Every suggestion is explainable and traceable.

AI Assistant

Talk to your third-party data in natural language and resolve questions instantly.

Compliance Agent

Spots gaps against DORA, ISO 27036 or NIS 2 across your third parties before the auditor does. Identifies which requirements apply to you based on your organisation's context.

Due Diligence Generator

Generates suggested questionnaires and assessment criteria for each vendor type.

Vendors & Assets Integrity Check

Analyses asset, vendor and risk ratings to check consistency and flag inconsistencies.

AI Risk Agent

An agent that identifies risks and controls, and proposes ratings and action plans.

Policy Generator & Document Processing

Drafts third-party contractual clauses and requirements, with traceable references, and automatically extracts and classifies documents and evidence.

Assessment Verifier

Analyses vendor questionnaires and evidence. Don't review them one by one: AI does it for you.

Quantitative Risk

Quantifies third-party exposure with Monte Carlo: expected loss, VaR and ROI.

WHAT MAKES US DIFFERENT

Truly all-in-one

A single platform instead of fragmented solutions: inventory, assessments, risk, incidents, audit and compliance — with AI.

Live in 3–6 months

Preconfigured frameworks and preloaded catalogues. No endless integration cycles.

Expert consultative support

Beyond software: our team adapts the solution to your operational and regulatory context.

The best ROI on the market

Flexibility, speed and support that make GlobalSuite® the most profitable GRC platform.

Recognised
